- **Productivity:** Azure DevOps, Odoo.

Soft skills

- Leadership
- Problem solving
- Self teaching
- Adaptability
- Mentoring

About me

Full Stack Engineer with 4 years of experience transforming complex requirements into cross-platform web and mobile applications. Specialized in the Microsoft ecosystem (.NET, Azure). I have recently transitioned into a Tech Lead role, spearheading the centralized service architecture that powers the company's entire fintech and logistics portfolio.

Experience

Tech Lead .NET Developer

June 2024 - Current

PowerGas

Hybrid

- **Spearheaded the design and architecture** of a centralized service core using Microsoft Environment, enabling the scalability of fintech and logistics business units.
- **Lead and mentored a cross-functional** development team, ensuring high code quality through rigorous code reviews and architectural oversight.
- **Managed the full Application Lifecycle Management** implementing automated CI/CD pipelines and orchestrating cloud resources in Azure DevOps.

Lead Developer Magento 2

June 2023 - May 2024

Codebay

Remote

- Engineered and maintained custom Magento 2 modules.
- **Architected API integrations** for seamless payment processing, logistics, real-time shipping tracking, and automated tax calculations.
- **Optimized platform functionality** by integrating and customizing advanced plugins.

Mobile and Web Developer

December 2022 - June 2023

Red om

Remote

- **Spearheaded the development** of a customer-centric mobile platform using Flutter, Quasar, and Vue.js.
- Successfully integrated complex third-party APIs, including Stripe, PayPal, Oxxo, and Google Maps API.
- **Designed and managed NoSQL databases** (Firestore), establishing efficient real-time data synchronization with Odoo ERP.

Web Developer

December 2021 - January 2023

Agenda Ambiental, UASLP.

Remote

- Developed a multifaceted web platform with modules for streamlined automation.
- **Created and integrated custom APIs** for student registration.
- Developed interactive evaluation rubrics and shared forms for real-time academic assessment.

Education

Bachelor of Engineering in Intelligent Systems

June 2023

Universidad Autónoma de San Luis Potosí - México

GPA: 82

- Minor in Full Stack Developer
- Relevant Coursework: Data structure, Data base, Algorithms and Complexity, Object Oriented Programming (OOP), Web development, Mobile Application development, Robotics, Data analysis.
